On the topic of international trade, the views of economists tend to differ from those of the general public. There are three principal differences. First, many noneconomists believe that it is more advantageous to trade with other members of one's nation or ethnic group than with outsiders. Economists see all forms of trade as equally []

International Trade - Econlib

We propose a panel data estimation strategy for quantifying the effects of the container revolution on international trade. We exploit time and cross sectional variation in countries' first adoption of container facilities and product level variation in container usage.

Estimating the effects of the container revolution on

But can the debate really be as one-sided as I portray it? Well, look at the results: again and again, people on the opposite side prove to have used bad logic, bad data, the wrong historical analogies, or all of the above.
