In computer engineering, microarchitecture, also called computer organization and sometimes abbreviated as µarch or uarch, is the way a given instruction set architecture (ISA), is implemented in a particular processor. A given ISA may be implemented with different microarchitectures; implementations may vary due to different goals of a given ...

A complex instruction set computer (CISC / Ēˆ s Ēˆ s k /) is a computer in which single instructions can
execute several low-level operations (such as a load from memory, an arithmetic operation, and a memory
store) or are capable of multi-step operations or addressing modes within single instructions.
